EDUCATION

Don Bosco Institute of Technology

Bachelor of Engineering in Information Technology (Honors in cyber security); CGPA: 9.22/10

Feb. 2022 – 2026

Mumbai, India

- Ranked 1st in Semester 5 and Ranked 3rd in Semester 4 based on CGPA performance.

WORK EXPERIENCE

Don Bosco Institute of Technology / Web Developer Intern

Aug 2024 – Aug 2025

- Developed and maintained the IT Department website using, HTML, CSS, JavaScript.
- Collaborated with team to **design** and implement new features for an improved user experience.

PROJECTS

Academix / MongoDB, React, Express.js, JavaScript /

- Developed a MERN stack-based analytical web application, Academix, to calculate **attainment levels** for course outcomes (CO) and program outcomes (PO) as per **NAAC**-provided Criteria.
- Optimized database queries and implemented **scalable** architecture to handle large datasets efficiently.
- Awarded **2nd** prize in the **InnoQuest** competition for developing Academix, recognized for its innovative approach to academic performance analysis.

Clinix / Microservices Architecture, Java, Spring Boot, Docker, Kafka /

- Built a modular microservices system using **Spring Boot**, splitting responsibilities across Patient, Billing, and Analytics services for better scalability and maintainability.
- Used **Docker** Compose to manage containers for services, **Kafka**, and PostgreSQL.
- Implemented event publishing (Kafka) and remote procedure calls (**gRPC**) using Protobuf for efficient communication.

Social Media Addiction Prediction System / Machine Learning, XGBoost, Django, EDA /

- Developed a machine learning model using **XGBoost** to predict social media addiction risk, achieving 93% accuracy based on behavioral and psychological user data.
- Performed comprehensive exploratory data analysis (**EDA**) and implemented secure preprocessing techniques to maintain the integrity and confidentiality of sensitive information.
- Designed and deployed a **Django**-based web application that allows users to input relevant data and receive real-time predictions of their social media addiction risk.

GeoAttendance / Django, Mapbox, Python, OpenCV /

- Created a web application using Django, **Mapbox API**, and **OpenCV** to manage attendance within a geofenced area, ensuring students mark attendance only within a designated perimeter.
- Utilized OpenCV and JavaScript's **Quagga** library for efficient barcode scanning, enhancing the security and accuracy of the attendance process.
- Designed a comprehensive **user management system** with the ability to analyze attendance records, providing valuable insights and reporting for administrators.

TECHNICAL SKILLS

Data Structures	Algorithms	Java	MySQL	SpringBoot	AWS
Microservices	Docker	Git/Github	Javascript	React	MongoDB

CERTIFICATIONS

Google AI – ML Virtual Internship - AICTE

April 2024 – June 2024

- Implemented and optimized **machine learning models** using leading algorithms and frameworks.
- Solved real-world problems with AI/ML, demonstrating innovation across various industries.

Palo Alto - PCCET - AICTE

June 2024 -August 2024

- Acquired essential knowledge in **network, cloud, and security operations**.
- Learned cutting-edge **Palo Alto Networks technologies** to protect against evolving cyber threats.

ACHIEVEMENTS

- Awarded 2nd place at InnoQuest, our college's Mini Project Exhibition.
- Awarded for securing the highest marks in SSC.
